

Acceptable System Specifications

Revised 3/2019

Server

Operating System

Microsoft Windows® 2008 R2 Server
(Microsoft support ending for Server 2008 R2 Jan 2020)
Microsoft Windows® 2012 Server
Microsoft Windows® 2012 R2 Server
Microsoft Windows® 2016 Server

On all Operating systems we recommend the latest service pack and Windows updates.

Memory

≥ 8 GB memory.
Please consult depending on number of users and Server Operating system.

Hard Disk

Minimum 10 GB free hard-disk space for the server and depends on document storage.

Other Requirements

.Net Framework 4.7.2 is the minimum version required for new installs of FilePro.

Sharing of tasks and appointments requires minimum of Microsoft Exchange Server 2010.
(Microsoft support ending for Exchange 2010 in Jan 2020)

Document search within FilePro requires Windows Search to be running on the server where the documents are located.

SQL Server

Microsoft SQL Server® 2008 R2
(Microsoft support ending for SQL 2008 R2 in Jul 2019)
Microsoft SQL Server® 2012
Microsoft SQL Server® 2014
Microsoft SQL Server® 2016
Microsoft SQL Server® 2017

For sites with more than 10 users, FilePro recommends SQL Standard as opposed to Express.

SQL is to be installed in Mixed mode Security and SA password will need to be available to FilePro Support and accounting user of FilePro.

Network

Recommend wired Gigabit Network speed.

Security

Require a minimum of local admin user rights for the installation.

Workstation or Standalone
